

Application No.: 10/050,366
Response to Office Action of August 13, 2003
Attorney Docket: ROPTK-002CQ

Amendments to the Claims:

Please add new Claims 12-17 as shown.

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-9 (canceled)

Claim 10. (Previously Presented) An optical stack of laminated removable lenses for affixing to a viewing surface comprising:
a plurality of superposed removable lenses adhesively affixed to one another;
each said removable lens being held to each successive lens with a clear uninterrupted adhesive layer interposed between each said removable lens;
each said lens having a removable tab portion on at least one end which does not have any adhesive layer on either side of said tab portion such that when the optical stack of laminated removable lenses is affixed to a viewing surface a user can quickly grasp said removable tab portion for removing the top lens of the optical stack of laminated removable lenses and expose a clean lens directly underneath said removed top lens.

Claim 11. (Previously Presented) The optical stack of removable lenses as recited in claim 10 further comprising: a second removable tab portion opposite the end of said removal tab portion.

Claim 12. (New) The optical stack of removable lenses as recited in Claim 10, wherein the clear uninterrupted adhesive layer has a negligible thickness.

Claim 13. (New) The optical stack of removable lenses as recited in Claim 10, wherein there are no evident reflections when looking through the optical stack of laminated removable lenses.

Claim 14. (New) An optical stack of laminated removable lenses for affixing to a viewing surface comprising:

a plurality of superposed removable lenses adhesively affixed to one another; each said removable lens being held to each successive lens with a clear uninterrupted adhesive layer interposed between each said removable lens such that there are no evident reflections when looking through the optical stack of laminated removable lenses; each said lens having a removable tab portion on at least one end which does not have any adhesive layer on either side of said tab portion such that when the optical stack of laminated removable lenses is affixed to a viewing surface a user can quickly grasp said removable tab portion for removing the top lens of the optical stack of laminated removable lenses and expose a clean lens directly underneath said removed top lens.

Claim 15. (Previously Presented) The optical stack of removable lenses as recited in claim 14 further comprising: a second removable tab portion opposite the end of said removal tab portion.

Claim 16. (New) An optical stack of laminated removable lenses for affixing to a viewing surface comprising:

a plurality of superposed removable lenses adhesively affixed to one another; each said removable lens being held to each successive lens with a clear uninterrupted adhesive layer of negligible thickness interposed between each said removable lens; each said lens having a removable tab portion on at least one end which does not have any adhesive layer on either side of said tab portion such that when the optical stack of laminated removable lenses is affixed to a viewing surface a user can quickly grasp said removable tab portion for removing the top lens of the optical stack of laminated removable lenses and expose a clean lens directly underneath said removed top lens.

Claim 17. (New) The optical stack of removable lenses as recited in claim 16 further comprising: a second removable tab portion opposite the end of said removal tab portion.
